

Your money, fully in hand — even offline.

An offline-first, multi-currency expense & wealth manager — tracking, planning, and AI projections in one private, cross-device app.

Offline-first

PWA + local SQLite

Multi-currency

per-account + FX

Private by design

zero-trust encryption

THE PROBLEM

Personal finance tools break exactly where life happens.

Online-only

Bank-linking apps stall with no signal, in transit, or across borders — the moments you most need to log a spend.

Single-currency bias

Expats, freelancers, and travelers juggle multiple currencies; most apps assume one.

No forward view

Trackers show the past. Almost none project income vs. spending, inflation, and savings years ahead.

Privacy as an afterthought

Aggregators sell insight into your financial life; sensitive data sits readable on servers.

One private hub for tracking, planning, and projecting your money.

Track

Multi-account, multi-currency ledger.
Balances derived from an append-only
ledger — accurate by construction.

Plan

Planned Cashflow hub unifies recurring
income, payments, subscriptions, loans, and
savings.

Project

Deterministic, inflation-aware AI engine
forecasts your 1/2/3-year financial structure.

Works fully offline • syncs across devices • installable PWA

THE PRODUCT

A complete money OS — not another expense tracker.

Accounts & Ledger

6 account types, ledger-derived balances

Transactions

income/expense/transfer, breakdown,
on-device auto-categorise

Budgets & Goals

period budgets, emergency-fund-first
goals

Planned Cashflow

incomes, payments, savings + AI
projections

Splits

groups & trips, settle-up, shared ledger

Investments

holdings + daily market data

Ask PocketCare

AI assistant, visual & actionable answers

Statements & Insights

PDF export, 15+ insight charts

A defensible architecture, not just a feature list.

Offline-first sync engine

PowerSync + local SQLite: instant, works with zero signal, reconciles server-authoritatively. Hard to retrofit; we built on it from day one.

Zero-trust privacy

Envelope encryption of sensitive fields — the server holds ciphertext + wrapped keys, never plaintext. Auto-categorisation runs on-device.

Deterministic projection engine

Pure, unit-tested finance core (compounding, inflation, recurring math) powering goal ETAs and 1/2/3-year cashflow forecasts — no black box.

Truly multi-currency

Per-account currency, display-time FX, base-currency net worth — for expats, freelancers, and cross-border life.

We answer the question every tracker ignores:

“Where will I stand in 3 years?”

1

Consolidate

Recurring income, subscriptions, loan EMI, household costs, and savings in one hub.

2

Normalize

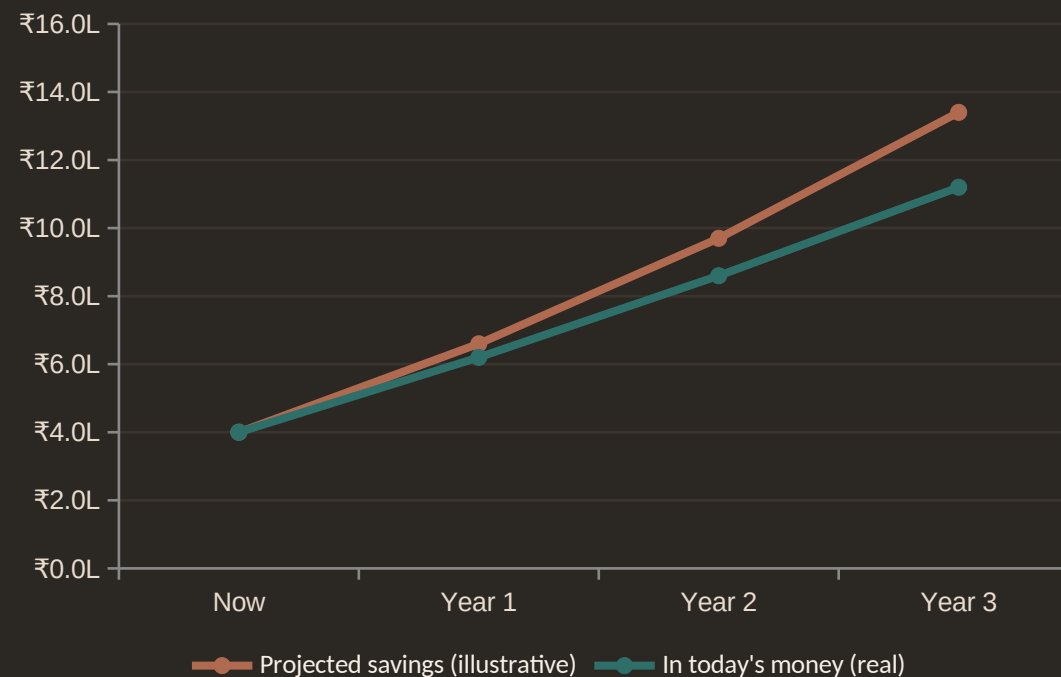

Everything reduced to monthly-equivalent minor units; totals per month/quarter/year.

3

Project

Month-by-month compounding with inflation + income growth → nominal & real balances.

Illustrative — engine output, not a forecast of returns

MARKET

A large, global, underserved wedge.

TAM

[₹/\$ X B]

Global personal-finance & budgeting software

SAM

[₹/\$ Y B]

Multi-currency / privacy-conscious users
(expats, freelancers, emerging markets)

SOM

[₹/\$ Z M]

3-yr obtainable — [region] mobile-first savers

[PLACEHOLDER] Insert sourced market figures & assumptions. Tailwinds: mobile-first savers in emerging markets, gig/creator economy, rising privacy expectations, cross-border work.

BUSINESS MODEL

Freemium, with recurring subscriptions + AI credit packs.

Free

₹0

- Accounts & transactions
- Search & basic balances
- One budget
- Planned Cashflow basics

Lite

₹49/mo • ₹499/yr

- Everything in Free
- Multi-budget + alerts
- Goal projections
- 50 AI prompts / mo

Pro

₹99/mo • ₹999/yr

- Everything in Lite
- Insights & statements
- Investment auto-fetch
- 200 AI prompts / mo

+ One-time AI credit packs (₹29 / ₹49 / ₹99). Payments via Razorpay. [PLACEHOLDER] ARPU, conversion %, CAC/LTV to be added.

Product shipped. Now proving the loop.

Shipped (verifiable in-repo):

- Full web PWA: dashboard, accounts, transactions, cards, budgets, goals, cashflow, investments, splits, insights, statements, assistant
- Offline-first sync (PowerSync ↔ Supabase), multi-currency, i18n, dark mode
- Freemium billing (Razorpay), zero-trust encryption, 49+ passing core tests

COMPETITIVE LANDSCAPE

Trackers, splitters, and budgeters — no one owns the whole picture.

	Offline-first	Multi-currency	Planning + projections	Bill-splitting	Privacy-first
PocketCare	●	●	●	●	●
Mint-style aggregators	○	○	◐	○	○
YNAB-style budgeters	○	◐	◐	○	◐
Splitwise-style	○	◐	○	●	◐
Spreadsheets	●	●	◐	○	●

From shipped core to intelligent, connected money.

Now

Shipped

- Web PWA, offline sync
- Planned Cashflow (BETA)
- Freemium + encryption

Next

0-6 months

- Bank/statement import
- Smarter on-device AI categorisation
- Notifications & goal nudges

Later

6-18 months

- Native mobile + widgets
- Shared household finances
- Open-banking (regional)

Raising to turn a shipped product into a growing business.
